

**THE GLOBAL SOURCE FOR
WESTINGHOUSE POWER
DISTRIBUTION PRODUCTS
& RELATED EQUIPMENT**

If Westinghouse Made It, We Supply It

If you've been struggling to find genuine Westinghouse replacement parts for your power distribution equipment and systems, look no further. At Homewood, we have what you need to keep your operations running smoothly.

As a former manufacturing division of **Westinghouse Electric Corporation**, we've been specializing for nearly 100 years in the production of genuine Westinghouse power distribution equipment.

Because we're an OEM, we can provide complete units, or individual components or parts, built to original Westinghouse specifications. Our technical library contains more than 20 million original Westinghouse records, and our engineering team has the expertise to meet your specific requirements.

Additionally, if you have the shop order or part number, we can supply the right product based on that information. Because we manufacture parts and equipment based on original shop orders, there's no guessing on dimensions, and we guarantee the replacement will be a perfect fit.

Genuine Westinghouse Products Extend the Life of Your Equipment

For more than a century, Westinghouse has designed and built superior equipment for power distribution and industrial applications.

Homewood is proud to continue the Westinghouse tradition of excellence by extending the life of your equipment without expensive change-out costs, environmental concerns and worker re-training.

With Homewood, you get proven technology that provides years of superior service.

Westinghouse Motor & Gearing Products

AC & DC Motors and Related Products

- Induction Motors (including Wound Rotor)
- Synchronous Motors
- Gear Motors
- Brake Motors
- Generators
- AISE Mill Motors

Specific Purpose Motors

- Exciters & Auxiliary Generators
- Motor Generator Sets
- Traction Motors & Generators
- Shaker/Vibrator Industrial Motors
- Diesel-Electric Locomotive Motors
- Jacking Rig Motors
- Hydrogen Purity Meter Blower Assemblies

TECO-Westinghouse

Master distributor for vintage and current production motor and drive parts

- 1 through 20,000hp – AC & DC

Switchgear

We have a variety of low, medium and high voltage Westinghouse switchgear products, including:

AC Low Voltage

Westinghouse

- DA
- DB
- DK
- DS
- Molded Case

AC Medium Voltage

Westinghouse

- DH
- DHP
- CA (Compressed Air) 2000-7000 Amps 15 to 34.5 KV
- OCB (Oil Circuit Breakers) 5 to 35 K
- SF6 – 15 to 34.5 KV

AC High Voltage

Westinghouse

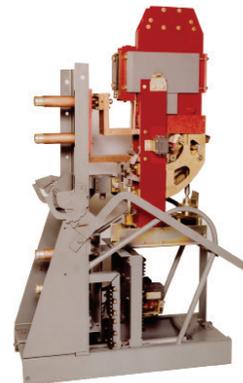

- OCB – 34.5 to 800 KV
- SF6 – 34.5 to 800 KV

DC

Westinghouse

- DBF
- DMD
- DM
- DR

(up to 10,000 amp)

Control Products

We provide a comprehensive array of Westinghouse switches, panelboard items and more to help you maximize uptime.

Switches

- Master Switches
- Knife Switches
- Limit Switches
 - Proximity
 - Planner
 - Precision
 - Types W & W2

Oil-Tite (OT) Push Buttons

Our Westinghouse Oil-Tite push button and selector switches and indicating lights are designed to prevent oil, coolant, cutting oil and water from damaging contacts. OT enclosures, machine cavities and other protective solutions offer maximum flexibility through operator and contact blocks. They also provide minimum projection in front of the panel, shallow contact blocks behind the panel and a contact block for stacking, and interchangeable operator color caps.

Available in standard and custom configurations, OT units can be assembled by the customer.

OT Panelboard Items

- Pushbuttons
- Selector Switches
- Indicating Lights
- Contact Blocks

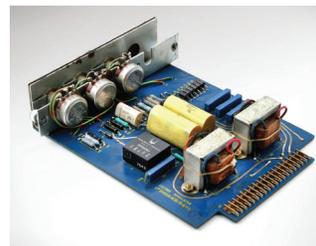

Miscellaneous Westinghouse

- Contactors
- Motor Starters
- Interlocks
- Line Starters
- Manual Rheostats
- Relays
- Timetactors
- Filter Paper
- Grid Resistors

Preferred Supplier of Siemens Quality Energy Products

Our wide selection of energy products and value-added services extends the life of Westinghouse exciters/automatic voltage regulators (AVRs). The parts and services we offer include:

- Spare Parts for WTA, PRX and MGR AVRs
- Repair, Exchange, Refurbish or Re-Fabricate Circuit Boards
- Power Drawer Refurbishment
- Test Only for Inventory Verification
- Serial Number Recorded for Lifetime History of Board

Value-Added Services

To help you get the most out of your Westinghouse Power Distribution Products, we provide:

- **Factory Service**
 - Revitalization & Repair
 - Refurbishment of Low and Medium Voltage Circuit Breakers
 - Ability to Work on Equipment Made by All Manufacturers
- **Instrumentation & Calibration Services**
 - Electrical & Mechanical Calibration Traceable to NIST
 - Reconditioning
 - Repair

We also offer procurement services to help you obtain parts and components made by other manufacturers.

Whether you need fully assembled units or parts, life extension kits or services, we're prepared to assist you.

To find out how we can meet your specific requirements, call **800.777.1172** or visit **www.homewoodsales.com**

To order OT pushbuttons and more, visit **www.homewoodecommerce.com**

The Westinghouse-Homewood Story

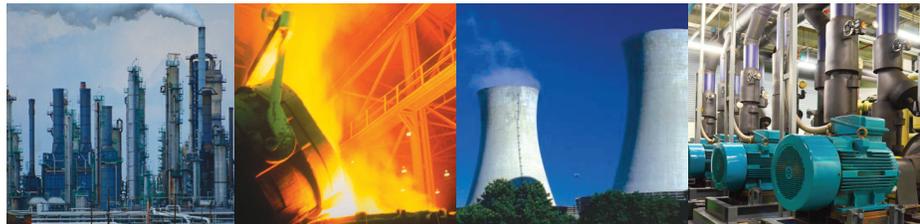

Did you ever wonder what happened to Westinghouse? For over a century, Westinghouse Electric Corporation was a global leader in the manufacturing of motors, generators, transmission and distribution equipment. Over the years, Westinghouse divested all of its manufacturing operations, including Homewood.

Since the installed base of Westinghouse equipment is immense worldwide, many companies, such as Homewood, bought the various products, along with the rights to continue to support the Westinghouse base. Each company has its own set of specific products that it manufactures.

Homewood has amassed the technical expertise, original documentation, tooling and strategic alliances which can

support the Westinghouse base of products. With our expertise acquired over decades of work in the power transmission & distribution sector, we are highly qualified to assist you with technical and commercial matters to help your operations remain efficient and profitable.

Whether you need parts, life extension kits, or complete motors and breakers, Homewood is here to provide cost effective solutions. Homewood has provided these solutions, along with engineering, installation and field service assistance, for Westinghouse equipment in over 45 countries. Can we help you with your revitalization program? Please call our toll free number 800-777-1172, or 412-665-2700 for additional assistance or visit our website at www.homewoodsales.com
