## **WESTINGHOUSE EQUIPMENT LIFE EXTENSION - BULLETIN #1**

### **TRANSFORMER COOLING FAN MOTORS**

#### **August 2010**

From time to time we will be forwarding bulletins highlighting specific products or technical updates aimed at assisting you in extending the life of your Westinghouse equipment. In this first bulletin we would like to focus on a product that may be of interest to you at this time.

With the heat intensifying throughout the country, we have been receiving numerous requests for transformer cooling fan motors from distributors as well as utility customers. There are a variety of these small horsepower motors available from Homewood. The most popular one is a 1.1 HP, 870 rpm motor that is used on Westinghouse oil filled large transformers in the range of 300-600 MVA. There are 3 different part numbers recognized for this motor: 773B734G01, 762C982H01 or 384P773G01. All generator step-up transformers have them.

The heavy electrical storms and high heat are stressing the motors and causing them to fail. This basically shuts down the transformer until it can be repaired or replaced. If you or your customer has the need for transformer cooling fan motors, Homewood has several style numbers in stock and we can ship them overnight the same day that we receive your order. Please contact us for current pricing and availability.

Whether or not you are in need of a transformer cooling fan motor at this time, please remember that we are here to support all of your needs for Westinghouse industrial products. As you know, Homewood Products Corporation (Homewood) is a reliable supplier that can support the installed base of Westinghouse equipment worldwide. As a former manufacturing division of Westinghouse Electric Corporation, we have continuously supported the Westinghouse product line since 1920.

As a Westinghouse OEM, Homewood specializes in the manufacture and/or procurement of Westinghouse industrial equipment. Our products include motors, generators (AC/DC), breakers (oil & air), and other Westinghouse industrial control equipment. Homewood can provide complete units, components or parts; all of which are built to original Westinghouse specifications. Remember, if you provide the Westinghouse nameplate data or part number, Homewood can provide new or rebuilt products to support you. Please visit our website, [www.homewoodsales.com](http://www.homewoodsales.com), to view a full array of products.

The next time that you need Compressed Air (CA) Breakers or parts, AC & DC Motors, DR, DMD, DM2F, DH Breakers or Oil-Tite Pilot Devices (OT Pushbuttons), give us a call at 800-777-1172 or 412-665-2700, visit our website at [www.homewoodsales.com](http://www.homewoodsales.com) or e-mail us at [sales@homewoodsales.com](mailto:sales@homewoodsales.com). Thank you for your continued business and support. We look forward to hearing from you soon.
