

THE WESTINGHOUSE - HOMEWOOD STORY

Did you ever wonder what happened to Westinghouse? For over a century, Westinghouse Electric Corporation was a global leader in the manufacturing of motors, generators, transmission and distribution equipment. Over the years, Westinghouse divested all of its manufacturing operations, including Homewood.

Since the installed base of Westinghouse equipment is immense worldwide, many companies, such as Homewood, bought the various products, along with the rights to continue to support the Westinghouse base. Each company has its own set of specific products that it manufactures.

Through our personal relationships, built over many years with colleagues that are now part of those other companies, we have formed close alliances. If we do not have the information to manufacture the item that you need, we will source genuine Westinghouse products, or their replacements, from our partners.

Homewood has amassed the technical expertise, original documentation, tooling and strategic alliances which can support the Westinghouse base of products. With our expertise acquired over decades of work in the power transmission & distribution sector, we are highly qualified to assist you with technical and commercial matters to help your operations remain efficient and profitable.

Whether you need parts, life extension kits, or complete motors and breakers, Homewood is here to provide cost effective solutions. Homewood has provided these solutions, along with engineering, installation and field service assistance, for Westinghouse equipment in over 45 countries. Can we help you with your domestic or international revitalization program?

**OUR MOTORS EXTEND THE LIFE
OF YOUR JACKING RIG!**

**Westinghouse Replacement Motors
for National Offshore Drilling Platforms**

www.homewoodsales.com

RESTORE “LIKE-NEW” PERFORMANCE TO YOUR JACKING RIGS

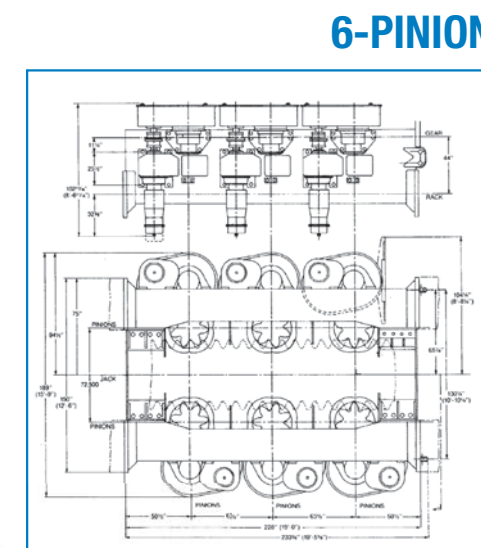

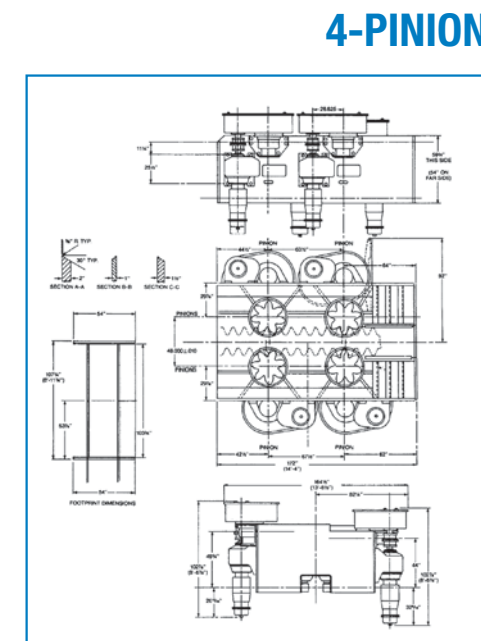

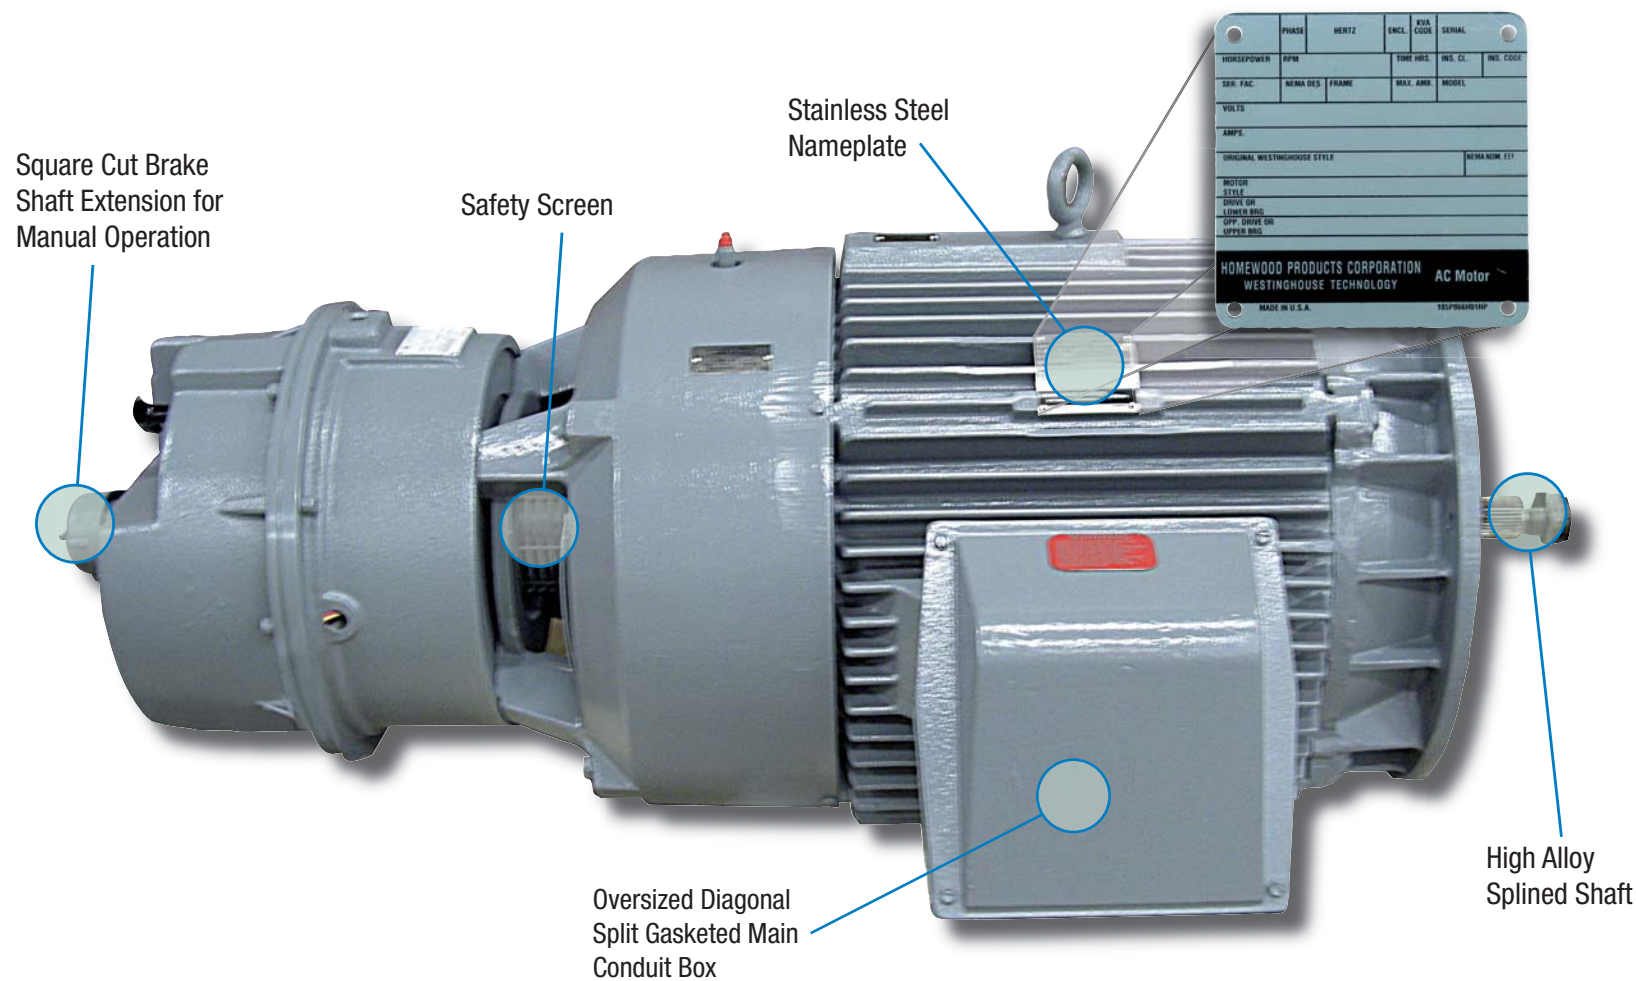

If your National offshore drilling platforms were made in the 1970s or later, they came with jacking rig motors manufactured by Westinghouse.

If those motors are wearing out, Homewood Products, an OEM for Westinghouse Electric Corporation technology, has the replacement units you need to raise and lower your platforms with maximum reliability.

Our replacement motors are available in 20 HP and 30 HP in **4-pinion fixed jack units**, as well as in **6-pinion floating jack units**.

Key *advantages* of Homewood Products replacement motors and parts:

- Maintain original design parameters
- Interchangeable with original Westinghouse and Reliance Electric motors
- Eliminate need to change control panel
- Parts manufactured to original OEM Drawings

EVERYTHING YOU NEED TO KNOW ABOUT HOMEWOOD PRODUCTS' REPLACEMENT JACKING SYSTEM MOTORS

Application

Mounting to Westinghouse Triple Reduction Gear Box, Type G Size 88T

Rating

20 HP

- 4 Pole
- 3 Phase 60 Hz
- 286 TYZ Frame
- Continuous Duty
- 1.15 Service Factor
- High Torque
- NEMA Design D, 8-13% Slip
- Available in: 230, 460 and 600 VAC
- 175 Lb. Ft. Brake

30 HP

- 4 Pole
- 3 Phase 60 Hz
- 364 TYZ Frame
- Continuous Duty
- 1.15 Service Factor
- High Torque
- NEMA Design D, 8-13% Slip
- Available in: 230, 460 and 600 VAC
- 330 Lb. Ft. Brake

Features

- AGMA Flange Mounting
- All Cast Iron Construction
- TEFC Enclosure
- IEEE-45 Marine Duty
- Meets Coast Guard and ABS Requirements
- High-Strength Steel Shaft
- Opposite Drive Extension for Emergency Turning
- Outer Oil Seal
- Tropical Insulation
- Winding Temperature Detectors
- Space Heaters
- Oversized Marine Duty AC Brake
- Automatic Drain Valve
- Manual Release
- Splined Shaft Drive Extension
